

Arsenii Tsarenko

.NET Web Developer

Summary

A 3rd year student of computer science at the Lublin University of Technology. Right now I am diligently studying .NET platform by myself and looking for my first professional experience in IT industry. I like learning new things and can easily switch technologies if it is necessary.

Experience

Student SQL project

Group project of two people. Project tasks: Designing and creating a database for an online shoe store(ERD diagrams), designing all relationships between tables, creating complete documentation for the database, generating code for creating a database.

Student app design project

Designing a distance learning platform in a group of two people. Project tasks: write project requirements, create basic uml diagrams, create ERD diagram for database.

Student Frontend project

The final project of subject Internet Applications from university. Contains basic HTML, CSS and JavaScript code. Also contains basic responsive Design. The JavaScript code is responsible for code validation, usage of local-storage, fetch-api and additional visual adjustments.
